

ABELMed Portal for Enhanced Communication that Benefits ...

Your Patients

ABELMed Portal offers an easy way for your patients to manage upcoming appointments. And, with Portal you can allow them to do much more:

- Receive appointments by email (replaces appointment cards). Appointments will be instantly added to the patient's e-calendar
- Confirm scheduled appointments by responding to email and text reminders
- Request / reschedule appointments online
- View all past and upcoming appointments
- Review their medications and request prescription renewals via secure messages to your inbox – ideal for Snowbirds
- View their personal health information record, including lab reports, allergies, current medications and medical history
- Review and update their demographic information
- Receive e-forms (i.e. Patient Intake). The completed form is returned to the patient's chart in the EMR
- Search an extensive library of patient education material

Patients will appreciate the ease and convenience of secure electronic interaction with your office.

Your Practice

Enjoy the benefits of enhanced patient communication. Email, text reminders and much more are all fully integrated with ABELMed for maximum efficiency. You control the portal settings to determine:

- Which patients have access to the patient portal
- Whether and under what conditions patients can confirm, book, reschedule, or cancel appointments
- Which appointment and demographic change requests you accept
- Which areas of personal health information are available to patients
- Your appointment book – patient confirmations automatically update your ABELMed scheduler!

Opt for ABELMed Mobile too. Enjoy convenient, secure access to appointment and select patient information from your ABELMed system while you are away from the office.

Your team can leverage powerful Portal features that add real value by supporting patient management and communication processes!
